

WgBoard

Responsive admin/dashboard template

- Base on Bootstrap 3
- WgFactory multi-layer widgets
- Easy color customization
- HTML5 & CSS3
- SASS

WgBoard - Responsive Multipurpose HTML Admin/Dashboard Template

Based on: Bootstrap 3.3.7

Author: Valery Timofeev

E-mail: spprofarm@gmail.com

Made with Love

Template Description

WgBoard is a professional Admin/Dashboard HTML Template and UI Kit. The template is based on the best responsive Bootstrap framework. The Bootstrap Framework makes it fully responsive to all screen resolutions and aspect ratios. Moreover, thus it carries a lot of useful features, for instance additional HTML5 elements, set of CSS components, grid system and much more. This template contains the basic elements that can be useful in developing the pages of your dashboard, including the landing page.

The template files are completely structured, CSS is compiled on the basis of prepared SCSS files, which greatly simplifies the development process.

Important note: images presented in the demo are not included

Features

- Clean design
- Admin/Dashboard Template
- UI Elements/Components
- CSS animation
- Simple install
- Easy customizable
- Bootstrap 3.x
- 1.5k+ free icons

 - external
 - includes
 - layout
 - mixins
 - schemes
 - theme
 - widgets
 - theme.scss Main scss theme file
- images Page images
- index.html
- {...PAGES...}.html

HTML-File Structure

Below is the basic structure of the html-file. Use this template to create new pages.

```
<!DOCTYPE html>
<html lang="en">
<head>

  <!-- Page title -->
  <title>Mejor - Responsive Multipurpose HTML Site Template</title>
  <!-- /Page title -->

  <!-- Meta -->
  <meta charset="utf-8">
  <meta http-equiv="X-UA-Compatible" content="IE=edge">
  <meta name="viewport" content="width=device-width, initial-scale=1">
  <!-- /Meta -->

  <!-- Favicon -->
  <link rel="shortcut icon" href="assets/img/favicon.png">
  <!-- /Favicon -->

  <!-- Styles -->
  <!-- /Styles -->

</head>
<body>

  <!-- Preloader -->
  <!-- /Preloader -->

  <!-- Main container -->
  <main class="main-container">
  </main>
  <!-- /Main container -->

  <!-- Scripts -->
  <!-- /Scripts -->

</body>
</html>
```

JavaScript

The main script file – **general.js**. It contains the initialization of all third-party template components, as well as basic operations. Below is the file structure

```
/* ----- */
*
* Template WgBoard - Responsive multipurpose HTML dashboard template
* Version 1.0
* Author Valery Timofeev
*
* ----- */

(function($) {

    'use strict';

    /* ----- */
    * Variables and Constants
    * Is Mobile
    * Prevent empty anchors
    * Smooth scrolling
    * Dropdown animation
    * Tooltips
    * Popovers
    * Malihu CustomScrollbar
    * Circle progress
    * jQueryUI Slide range
    * Sidebar navigation
    * Sidebar toggle
    * Sidebar search form
    * Widgets: general styles
    * Widget: project feed
    * Widget: Task list
    * Widget: chat
    * Widget: users list
    * Demo content: jqvmap
    * Demo content: calendar
    * Demo content: chart - latest campaign
    * Demo content: char - site visits
    * Charts, documentation page
    /* ----- */

}) (jQuery);

/* ----- */
* Finish loading
* ----- */
```

SCSS File Structure

Template styles are generated using the SASS preprocessor. Main file: [main.scss](#). It contains the connection of all parts of the template. Below is the file structure.

```
/* ----- */
*
* [Master Stylesheet]
*
* Project      WgBoard
* Version      1.0
*
* ----- */
* TABLE OF CONTENTS:
* ----- */
